One of the best burgers in town, the meat is fresh, the price is good and the service is great!! They're also the cheapest!

In my opinion, it's the best burger in the area. The size is perfect. The bread is soft, fluffy¹. The meat is cooked top perfection, which I appreciate a lot. I went with the "Carolina burger" and I loved it!

The burgers here are fantastic. I recommend trying the pimento cheese and the caramelized onions for toppings²! But the fries are just ridiculous. Why do you make skinny French fries? You can't do that to a potato! 5-star burgers, 1-star fries.

It sounds very cliché but it is very true: the most important reason why people love food trucks is because of the wonderful food! [...] There is always a food truck that offers exactly what you are in the mood for¹. [...]

Food trucks focusing² on one ingredient – think peanut butter or bacon – really go crazy with the most surprising creations. You will see the strangest variations on 'standard' dishes, such as waffles and hotdogs. And let's not forget about the themes some of the food trucks have; a Star Wars or Disney food truck is not an exception.
